**Rejections Under 35 USC §112, First Paragraph**

The Examiner has rejected Claims 1, 3-8, 14-25, 30, 32, and 33 under 35 U.S.C. § 112, first paragraph, as failing to comply with the written description requirement. Accordingly, the Applicants have amended the claims to recite "about 10' to about 1 degree" as originally claimed, and have amended the claims to remove the recitation of a first twist and a second twist in a direction opposite the first twist. Accordingly, the Applicants respectfully request that the Examiner reconsider and withdraw these rejections under 35 U.S.C. § 112, first paragraph.

**Rejections Under 35 USC §102(b)**

The Examiner has rejected Claims 9, 11-14, 16-25, 30, 32, and 33 under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,927,165, Issued to Vasudeva (Vasudeva) and U.S. Patent No. 3,733,937, issued to Mezey (Mezey).

The Applicants have amended claims 9, and 14 to more clearly describe the claimed invention and assert that Vasudeva and Mezey do not disclose each and every element of the invention as described in claims 9 and 14. Specifically, Vasudeva and Mezey do not disclose:

"one of the first and second polygonal interfaces has a first straight segment, a second straight segment, and a twisted segment positioned between the first and second straight segments wherein, the first segment, the second segment, and the twisted segment all engage the other one of the first and second polygonal interfaces"

Accordingly, the Applicants assert that claims 9 and 14, as amended, are allowable over Vasudeva and Mezey, and that claims 11-13 and 16-19 are allowable as depending, either directly or indirectly, from allowable independent claims 9 and

**Rejections Under 35 USC §103(a)**

The Examiner rejected Claims 1, 3, and 5-8 under 35 U.S.C. § 103(a) as being unpatentable over Mezey.

The Examiner rejected Claims 10 and 15 under 35 U.S.C. § 103(a) as being unpatentable over Vasudeva and Mezey in view of U.S. Patent No. 4,277,107, issued to Stone (Stone).

The Applicants have amended claims 1, 9, and 14 to more clearly describe the claimed invention and assert that none of the combined references disclose each and every element of the invention as described in independent claims 1, 9 and 14. Specifically, none of the combined references disclose:

"one of the first and second polygonal interfaces has a first straight segment, a second straight segment, and a twisted segment positioned between the first and second straight segments wherein, the first segment, the second segment, and the twisted segment all engage the other one of the first and second polygonal interfaces"

Accordingly, the Applicants assert that independent claims 1, 9 and 14, as amended, are allowable over the cited references and that claims 5-8, 10, and 15 are allowable as depending, either directly or indirectly, from allowable Independent
